# OUR STORY

Twenty-five years of experience in the garden equipment and in the molding of plastic components, with quality certifications that are constantly renewed.

AGP is currently one of the very few companies on the market to offer a complete catalogue of monofilaments and gardening products completely designed and manufactured in-house.

Even with an export between 40 and 50% of its production, AGP chooses to not delocalise and to remain “zero miles” in terms of suppliers too, maintaining high quality standards and speed of response to the customers’ needs.

Worldwide first in the gardening market to produce monofilaments made of recycled plastic using polyamides from chemical recycling, thus reducing the use of raw materials of fossil origin.

“Pyroline” is our range of filaments from circular economy, presented at EIMA 2021 and followed in 2022 by “Pyroline Whisper” which enhances the concept reducing noise emissions and fuel consumption because of the wire.

In 2020, widening the view on the sector, AGP also invested in the production of face shields.

Today we make in-house six different models complying to the last CE regulations.

In August 2018, the company moved to the new factory headquarter, spread over 4,800 square meters of covered area and 22,000 square meters of open areas.

The new plant is equipped with a 280Kw photovoltaic system and charging stations for electric cars.

In 2017 the quality system certification is updated to ISO 9001:2015, to confirm its production standards.

Willing to approach and develop new markets, AGP has, in 2015, included a new manufacturing line for the production of monofilaments FFF (Fused Filament Fabrication) for 3D printers.

In 2012 AGP obtained the certification of quality assurance system in accordance with Standard ISO 9001: 2008.

In 2007 “Attila Garden Product sas” becomes AGP srl. The newco starts its own production of monofilaments for different applications: garden power tools, agriculture and industry (fencewire, tannery, electrical).

In the year 2000 AGP decided to invest in machineries and infrastructure needed to produce and assemble its own heads. “Attilina” hits the market, allowing the company to achieve high sales volumes in Italy and becoming a player in the international gardening market.

AGP participated at worldwide trade fairs like GAFA in Cologne, Germany and EIMA in Bologna, Italy which will continue in the following years.

In 1997 “Attila Garden Product sas” was founded to industrialize the production of a trimmer head previously made in a traditional way.

The first step was to design and engineer the moulds for the brushcutter head “Attila”, a universal/multifilament model featuring extraordinary strength and ease of use.

NyoFuel	26
Nyofil	28
Nyofil industrial	29
Feelcolor	31

## Trimmer Line

**Nylgrass** is a professional quality trimmer line monofilament, made of the best co-polymer available on worldwide market. We do not supply different quality grades, just “the best” to face an hard work like grass cutting, where top flexibility and top strenght are the minimum features required. We mean “no compromise” on quality: the best raw materials, the most advanced extrusion system, full range of shapes, colours and packaging available. Considering our market experience and flexibility on service, we are the right partner to developpe your trimmer line business.

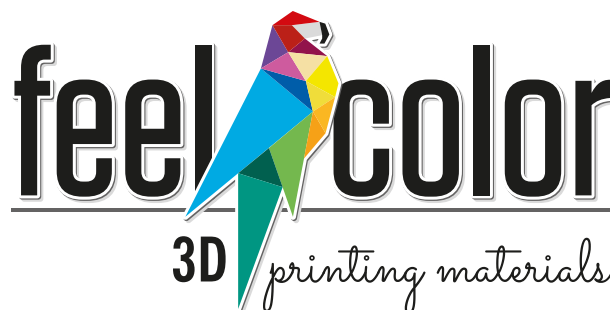

## Tecnical Wire

**Nyofil** is a PA 6 monofilament extruded with high technology system for agriculture and industry application. Tough and flexible, it can easily replace steel wire.

## 3D printer filament

Under **Feelcolor** brand, AGP manufactures and distributes top quality 3D filaments available in huge range of materials, colors and packagings.

# Nylgrass

## Professional trimmer line

Nylgrass is a professional quality trimmer line monofilament, made of the best co-polymer available on world-wide market. We do not supply different quality grades, just "the best" to face an hard work like grass cutting, where top flexibility and top strength are the minimum features required.

Made in Italy

# Alu Made

## Trimmer line with aluminum

POLYMER + METAL = ALUMADE®

A special formula HD (heavy duty polymers) that combines the basic features of Nylgrass and the high resilience of the metal component.

For those who need the best performance in the most extreme cutting conditions.

Made in Italy

### Available profiles

 <b>square</b> 1.3 > 5.0	 <b>round</b> 1.3 > 6.0
 <b>penta</b> 1.3 > 5.0	 <b>star</b> 1.6 > 5.0
 <b>ellipse</b> 3.0 > 7.0	

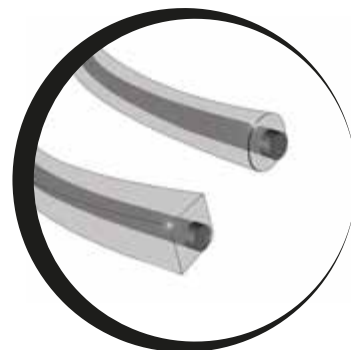

*For brush cutter*

# Magic Line

## Co-extruded Trimmer line

The state of the art of our trimmer lines.  
An outer shell more resistant to breakage and wear, an inner core copolymer HD super flexible.  
The quality made monofilament available in round and square section.

Made in Italy

**MAGIC  
LINE**

Available profiles

square  
2.0 > 4.5

round  
2.0 > 4.5

*For brush cutter*

# Stratus

## Tri-extruded professional wire

Monofilament for brush cutter.

This filament is made of high quality polymers, with cutting-edge production technologies and according to a proprietary recipe developed by AGP.

Available with various colors.

Made in Italy

**STRATUS**

Available profiles

square  
2.0 > 4.5

round  
2.0 > 4.5

For brush cutter

# Vertigo

## Low noise and aerodynamic wires

An aerodynamic profile means low noise, but above all, low air resistance and therefore less fuel waste and maximum yield for the machine.

Best cutting performances when used on our range of multi filament heads.

Available with various colors in elliptical section.

Made in Italy

### Available profiles

vertigo  
3.0 > 4.5

LESS NOISE

LESS FUEL CONSUMPTION

LESS WIRE BREAKAGES

MORE WIRE DURATION

For brush cutter

# Whisper

## Squared low noise and aerodynamic wires

An aerodynamic profile reduces noise and air resistance meaning less fuel waste and maximum yield for the machine.

Best cutting performances when used on our range of multi filament heads.

Available with various colors in square sections, single extrusion and co-extruded.

Made in Italy

### Available profiles

 <p><b>square</b> 3.0 &gt; 4.5</p>	 <p><b>co-extruded</b> 2.0 &gt; 4.5</p>
 <p><b>tri-extruded</b> 2.0 &gt; 4.5</p>	 <p><b>pyro line</b> 2.0 &gt; 4.5</p>

LESS NOISE

LESS FUEL CONSUMPTION

LESS WIRE BREAKAGES

MORE WIRE DURATION

For brush cutter

# Stratus Huracan

## Top performance wire

Huracan is the top of our monofilament range: triple extrusion combined with low noise profile.

Maximum cutting performance from weed to brambles. Resistance to abrasion, stretching and breakage: longer life means less wire needed.

Low noise and less fuel consumption for the maximum yield of the machine.

Available in various colour combinations.

Made in Italy

### Available profiles

huracan  
3.0 > 4.5

LESS NOISE

LESS FUEL CONSUMPTION

LESS WIRE BREAKAGES

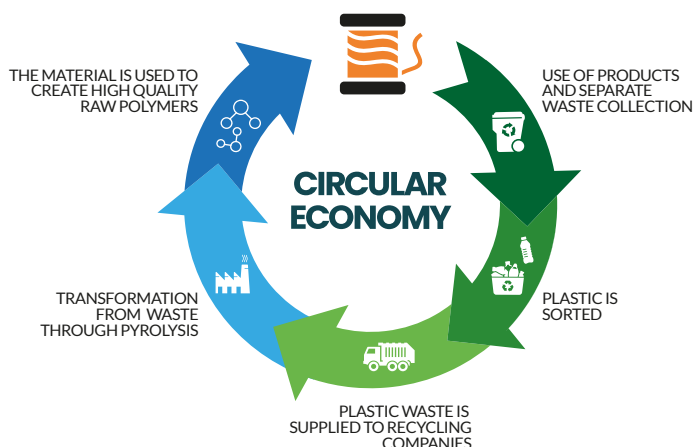

MORE WIRE DURATION

# Pyro Line

## Professional line from circular economy

Monofilament 100% PA from circular economy. The original products are transformed, using the pyrolysis process, into raw material (pyrolysis oil) later used to produce polymers identical to those of petroleum derivatives as certified by Ecocycle GmbH according to ISO 14021:2016. Monofilament with high end performance, a net reduction of carbon emissions and the total absence of raw materials of fossil origin.

Made in Italy

### Available profiles

# Customizations

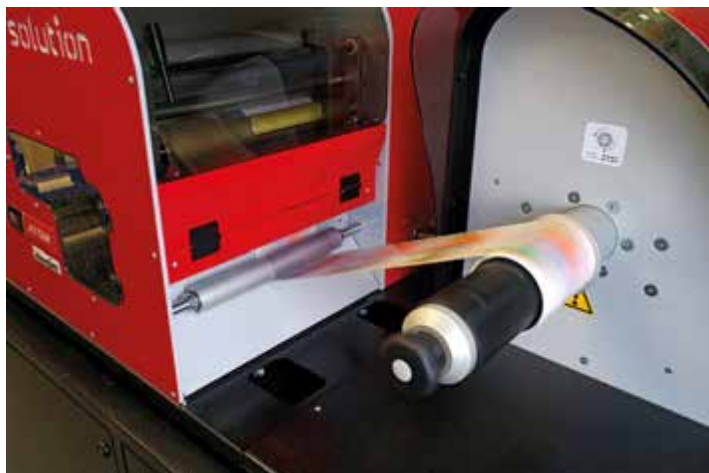

## Private label and custom packaging for a turnkey outsourcing service

AGP offers a wide range of packaging and tailor-made solutions carried out in-house to ensure maximum flexibility and short delivery time.

Labels are designed in collaboration with the customer's needs, following the company corporate design or creating your brand.

Monofilaments are available in various shapes, sizes and colours, including fluorescent, metallic (alu) and multi-colored (bi-extruded and tri-extruded).

Even more we can laser mark your logo on our big choice of steel blades

# Elasto Fil

## Wire for agricultural sucker remover

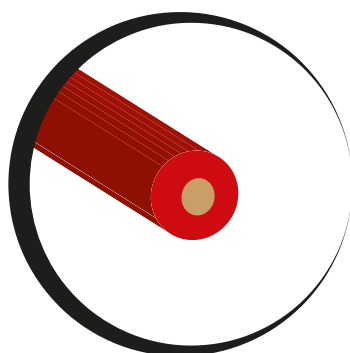

Wire for agricultural sucker remover, made with thermo-plastic elastomer co-extruded with textile core.

High performace line with top resiliency.

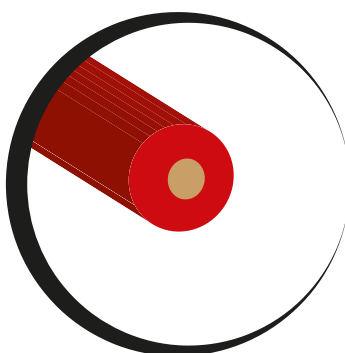

Flexible to reduce the damage on plants but strong enough to clean the base.

Diameters: 5/6/7/8 mm.

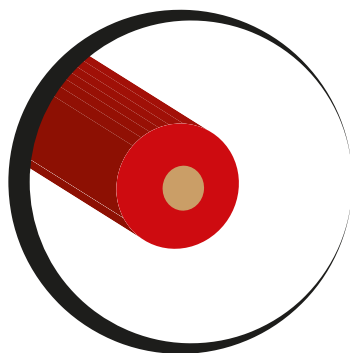

Made in Italy

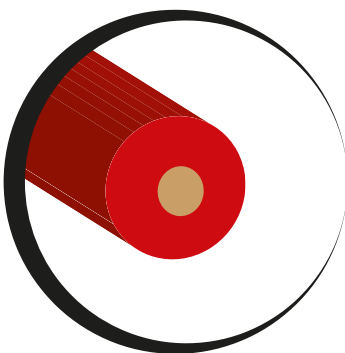

ATSPCPO50TQK  
Ø 5 mm

ATSPCPO60TQK  
Ø 6 mm

ATSPCPO70TQK  
Ø 7 mm

ATSPCPO80TQK  
Ø 8 mm

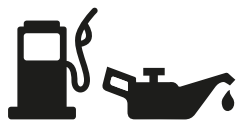

## NyoFuel

### TPU fuel hoses

Professional TPU fuel hoses.  
High flexibility and wear resistance.  
TPU guarantees maximum durability and resistance to hydrocarbons.  
Available in various diameters, suitable for 2 and 4 stroke engines.

Code	Description
ATTB2448-15	NyoFuel TPU Ø 2.4 x 4.8 mm - 15 m
ATTB3250-15	NyoFuel TPU Ø 3.2 x 5.0 mm - 15 m
ATTB4880-05	NyoFuel TPU Ø 4.8 x 8.0 mm - 5 m
ATTB6298-05	NyoFuel TPU Ø 6.2 x 9.8 mm - 5 m

High performance tubes for fuel and lubricants

High wear resistant  
Compatible with most of hydrocarbons  
Resistant to swelling  
High flexible and ease of use  
Specifically developed for fuels & lubricants

Made in Italy

ATTB6298-05  
ATTBPVC62-05  
0.244 x 0.385 in

ATTB4880-05  
ATTBPVC48-05

ATTBPVC24-15  
0.094 x 0.188 in

## High Torque

### PVC fuel hoses

PVC fuel hoses.  
Long life and resistance to hydrocarbons.  
Available in various diameters, suitable for 2 and 4 stroke brushcutters.

Code	Description
ATTBPVC24-15	PVC HIGH-TORQUE Ø 2.4 x 4.8 mm - 15 m
ATTBPVC32-15	PVC HIGH-TORQUE Ø 3.2 x 5.0 mm - 15 m
ATTBPVC48-05	PVC HIGH-TORQUE Ø 4.8 x 8.0 mm - 5 m
ATTBPVC62-05	PVC HIGH-TORQUE Ø 6.2 x 9.8 mm - 5 m

# Nyofil

## Agricultural and multipurpose wire

Nyofil is a PA6 monofilament produced with the most advanced extrusion technologies. Wide range of uses from domestic to agriculture. Made with high quality polymers, Nyofil is strong and elastic and can be used instead of metal wires. It doesn't oxidize and is not corrosive.

Main features:

- High tensile mechanical strength.
- Flexible and elastic.
- High resistance to atmospheric agents.
- Non-abrasive.
- Chemical inertness that guarantees long life.
- Up to 7 times lighter than steel wires.

Steel tensioners and aluminum wire clamps are also available.

Made in Italy

### Applications

As a soft support of growing plants.  
For vineyards trellis.  
For grazing and electric fencing  
As a support for sheets, tarpaulins and nets

# Nyofil Industrial

## Wire for electrical and industrial applications

Nyofil is a PA6 monofilament produced with the most advanced extrusion technologies. Wide range of uses in industrial and professional fields. Made with high quality polymers, Nyofil is strong and elastic. It doesn't oxidize and is not corrosive. High tensile mechanical strength both in traction and push.

Main features:

- Stiffness and elastic return.
- Flexible and elastic.
- High resistance to atmospheric agents.
- Non-abrasive, smooth and easy to slide.
- Chemical inertness that guarantees long life.

Made in Italy

### Applications

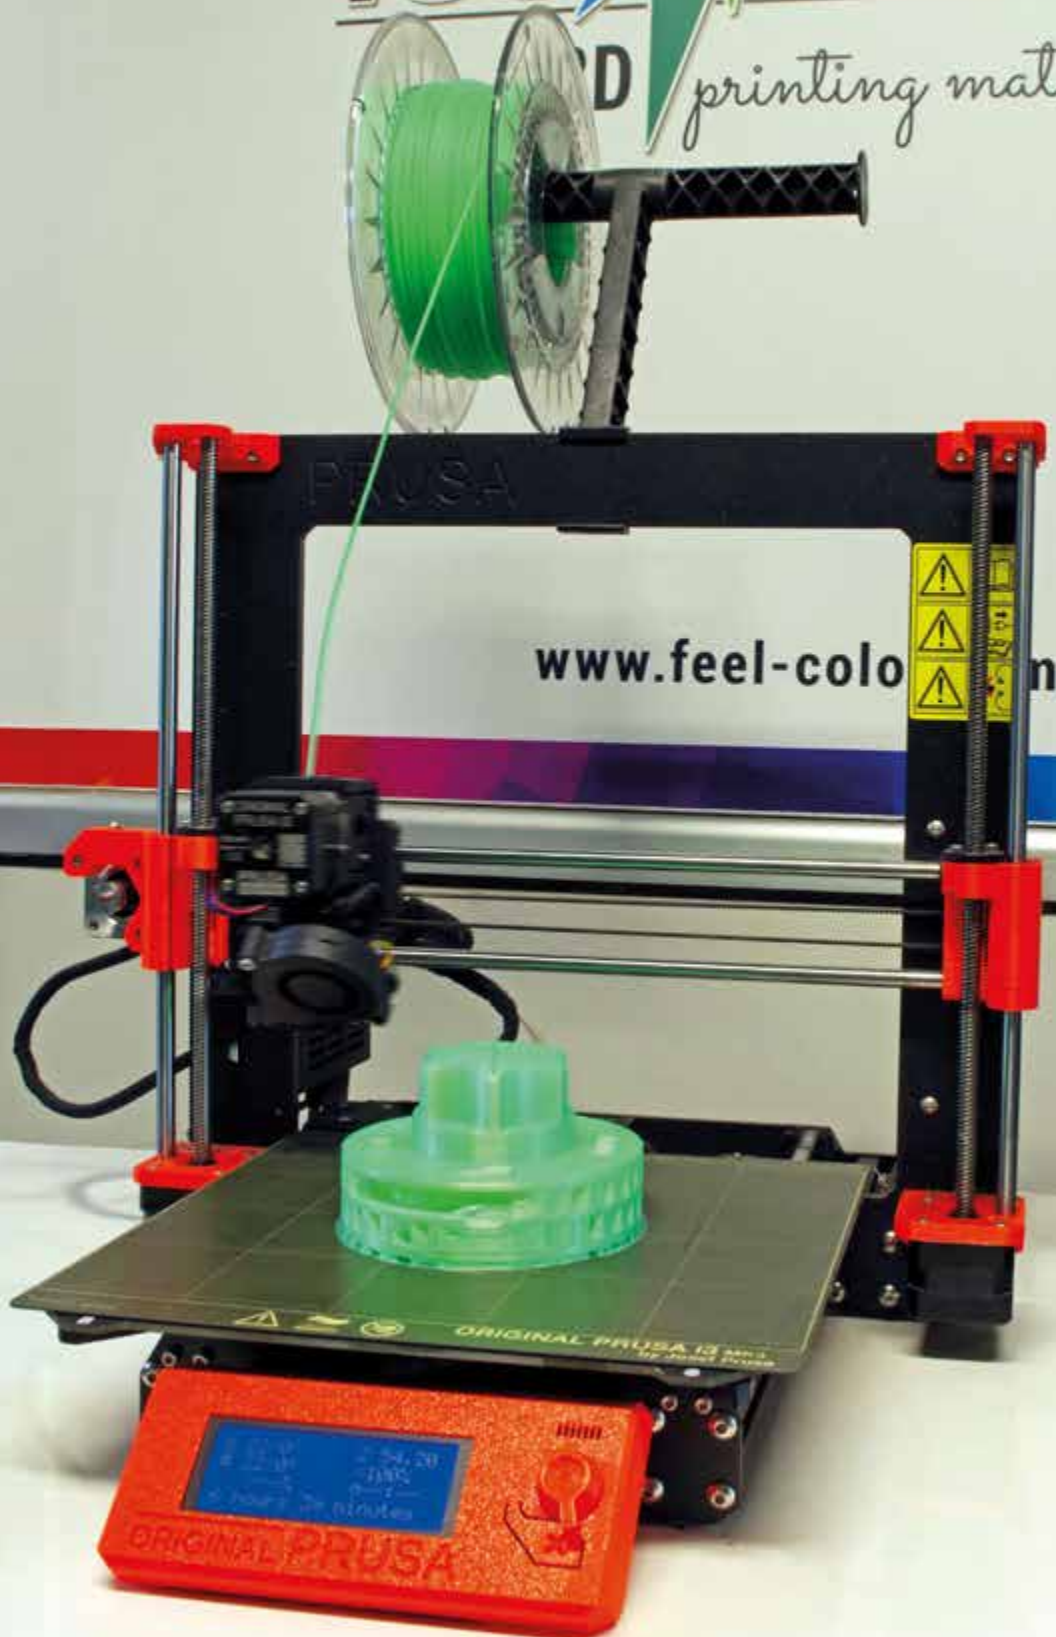

In tannery industry for leather colouring process. As guide for electrical probes thanks to its mechanical strength and flexibility.

## 3D printer filament

PLA, ABS, KANOVA, HIPS, PETG, TPU, PETG CARBON.  
This is the range of raw materials we use to extrude 3D monofilaments.

Our research and development dept is at work everyday to find materials with new capabilities and features.

That's why our range of products is constantly evolving to meet the future needs of our customers.

QUALITY 100% MADE IN ITALY

3d printer wire with diameter 1.75 or 2.85 mm.

Every meter of wire that comes out of our production department is subjected to automatic and human controls to ensure that diameters and colors meet the highest quality standards.
